## [Sales]

- **CADA-BOX's target order has not been met**  
**Affects approximately JPY -240 mil of sales**  
We saw CADA-BOX sales would be JPY 300 mil, which could not be achieved this year.
  
- **Subsidiaries could not achieve enough new orders (Doctorbook, MDV Trial)**  
**Affects approximately JPY -116 mil of sales**
  - Doctorbook: The dental field, an existing service, performed well. For the new medical field, since we are focusing on acquiring a doctor account, we have determined that it is difficult to achieve the prospected sales target.
  - MDV Trial : Orders for clinical trials using data have started to progress. Because collecting electronic medical record data delayed, we see the sales targets could not be achieved.

DPC data is a collective term for these various types of submitted data. In DPC data, the name of the inpatient, treatment / surgery, medication information, etc. can be found on a daily basis.

Realtime medical data (electronic medical record data) that can be used under a comprehensive data usage contract \* with a hospital

About **800,000** patients
