2Q FY2022 Financial Results
2Q FY2022 results highlights

(Millions of Yen)

> ## 1Q-2Q sales end on target, but no leeway for 2H
>
> Ordinary income slightly ahead of pace to reach full-year target of ¥1.6bn

Legend:
- Sales
- Ordinary income
- Ordinary income margin

	2Q FY2017	2Q FY2018	2Q FY2019	2Q FY2020	2Q FY2021	2Q FY2022
Sales	1,333	1,472	1,786	2,046	2,635	2,856
Ordinary income	142	△40	270	476	719	776
Ordinary income margin	10.7%	△2.7%	15.1%	23.3%	27.3%	27.2%

	Data network service	Data utilization service	All-company total
Sales YoY	971 △3.6%	1,885 +15.8%	2,856 +8.4%
Gross income YoY	626 △8.4%	1,734 18.2%	2,360 +9.8%
Ordinary income YoY	—	—	776 8.0%

【Sales progress】　Target 6,300

2Q FY2022 sales	2,856　45.3%
Average 2Q sales in FY2017-FY2021	43.6% (Avg.)

2Q FY2022 results comparison

> **Ordinary income margin of 23.5% in 2Q, stays at high level on a YoY basis too**
>
> Sales growth rate 14.1% on the new basis, close to the reference value (15%)

(Millions of Yen)	Actual (new basis)	2Q FY2022 (Apr–Jun 2022)			
		YoY (old basis)		【Ref.】 YoY (adjusted to new basis*)	
		Actual	Change	Ref	Change
Sales	**1,345**	1,205	+11.6%	1,179	**+14.1%**
Sales growth rate	**+11.6%**	+20.1%	△8.5P	—	—
Ordinary income	**315**	265	+18.9%	—	—
Ordinary income margin	**23.5%**	22.0%	+1.5P	—	—
Employees	**253**	246	+2.8%	—	—
Sales per employee	**5.3**	4.9	+8.5%	—	—

*Sales in 2Q FY2021 would have been ¥26mn lower when applying the new revenue recognition standards to contracts straddling FY2020 and FY2021 and FY2021 and FY2022 .
Change in sales booking method from new revenue recognition standards

Adjustment in historical sales data to reflect new standards

Main impact on sales from medical data survey analysis in Data utilization service

All sales this year to be booked under new standards

(Example) Provision of data over 12 months from March under 12-month data contract (assuming 120 units)

Sales booking under old standards

Sales booking under new standards

109	1	1	· · ·	1	1	1	1

FY2022 business strategies and current progress

Sales of cloud-based services and response to active pursuit of external partnerships

Furthering understanding of our strategy of shifting to the cloud

Business strategy   **Progress**

1 | **Shift data network service operations to the cloud** | ▶ | ◯
  - Rise in no. of hospitals using 'MDV Act'
  - Progress on orders pairing 'Karteco' and medical check systems

2 | **Strengthen data utilization service overseas and in the insurance field** | ▶ | ◯
  - Added this strategy to links with DeNA
  - Measures to grow the scope of data utilization

3 | **Develop the HMV business** | ▶ | ◯
  - Some measures with SBI have taken shape

1)-① Pursue a shift to cloud operations focused around 'MDV Act'

Benefits of shift to cloud ＝「expanded customer base」and「cross-selling」

Initial widening of scope to data submission addition hospitals, target cross-selling when paid functionality is launched

Enable demonstration of practical data utilization to user hospitals with data in the MDV cloud

platform
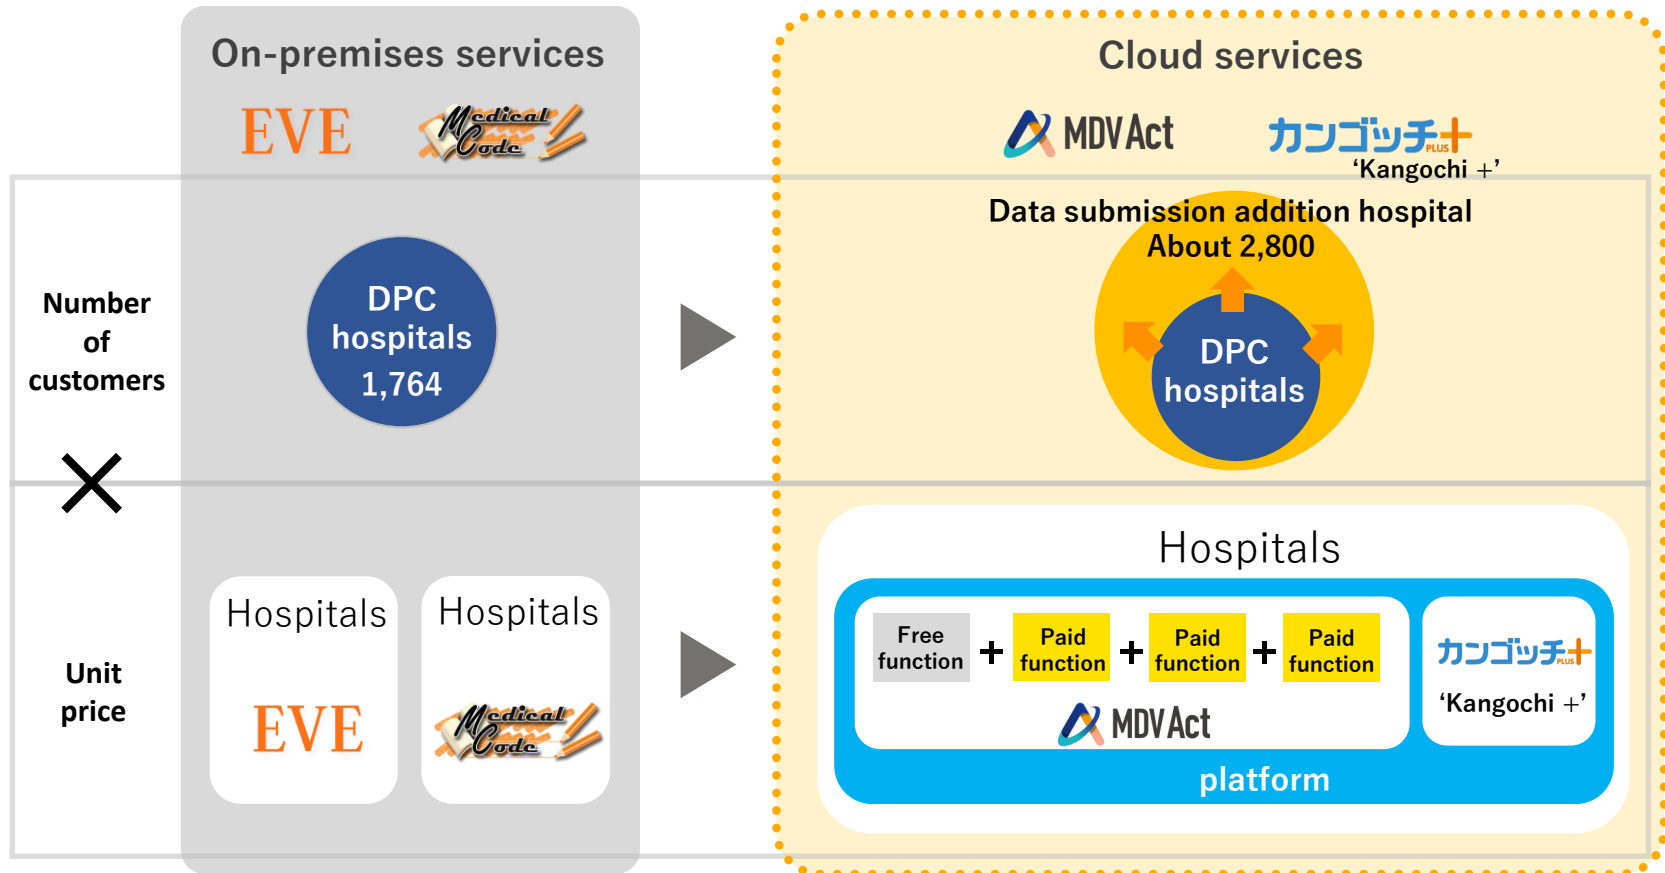

1)-① Contract growth for 'MDV Act'

Progress on capturing new users with no existing contract

Launch of 'MDV Act' helped **secure more than 160** new users
FY2022-end target 1,000, but aiming for even further growth in the future
	FY2019 (Result)	FY2020 (Result)	FY2021 (Result)	1Q FY2022 (Result)	2Q FY2022 (Result)	FY2022 (Target)
No. of hospitals using 'EVE'	802	772	770	753	750	750〜770
No. of hospitals using 'MDV Act'	0	0	558	757	803	1,000

1)-① Measures to achieve FY2022 target for 'MDV Act'

Further strengthening structure to achieve FY2022 target of 1,000 hospitals

Widening customer target group by adding new services, approaching potential customers, etc.

1 **Adding functionality for report creation on outpatient capabilities to 'MDV Act'**

✓ Plan to add "outpatient capability reporting system" in the autumn of 2022
✓ Help in smooth creation of reports via contract for 'MDV Act'
✓ Enable showcasing of 'MDV Act' to hospitals supplying and adding data (about 2,800)

2 **Hold large-scale seminars for potential customers of 'MDV Act'**

✓ Joint seminar with Tama University attracted 769 people from 633 facilities, including distribution
✓ Hold seminars showing how use of 'MDV Act' can enable analysis of a hospital's management indices

3 **Providing individual lessons for 'MDV Act' users**

✓ Promote continued use of 'MDV Act' after contract by providing support for utilization methods

Shift to cloud makes external linkages easier

Collection and integration of medical data under our 「**open alliance**」
will lead to further growth in data utilization services

⋯► **Medical and medical check data**

1)-② Medical check systems installed as a set with 'Karteco'

Future vision including 'Karteco' to boost installation as a set

Encourages retesting of patients in which anomalies were detected, which is not conducted at medical test centers, by building a pathway to retesting consultation, offering the prospect of increase in patient numbers
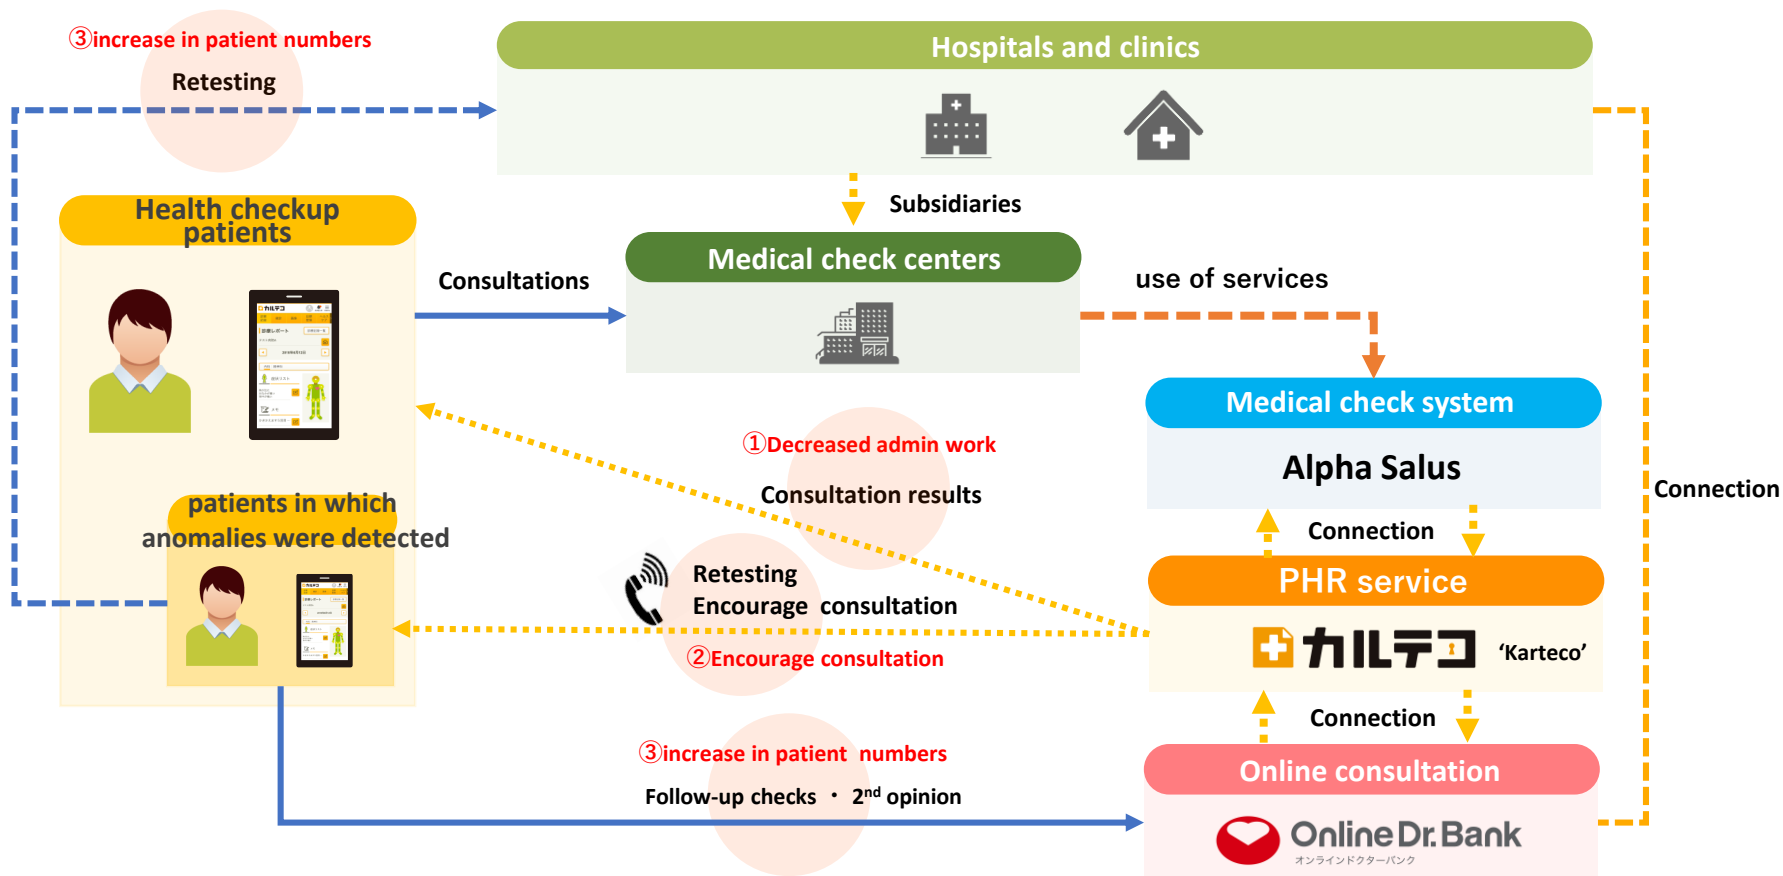

2）Expand data sales, inc. overseas, and strength operations in insurance field

---

Added business alliance with DeNA to focus businesses for FY2022

Integrated DB loaded onto 'MDV analyzer' and aim to begin service soon

---

MDV medical.data.vision

:DeNA HEALTHCARE
Health insurance data on more than 15mn people

Health Insurance Associations: 7.80mn people

Health Insurance Associations + local authorities: 8.08mn people

Hospital data: 40.16mn (actual patient number)

Largest medical DB in Japan

*Data as of end-Jun 2022

Outline of the Business Alliance

1.Collaboration in data utilization
①By combining the database of both companies, it would result into the largest medical database in Japan, regrouping 40 million patient hospital data combined with health insurance data of 15 million patients.
②The combined database will be the data source of MDV analytics web tool 「MDV analyzer」 and the service is expected to go-live this summer.

2.Collaboration in Direct-to-Consumer health promotion services
By sharing know-how of their respective services such as MDV's PHR service "Karteco" and DeSC Healthcare's "kencom" both companies will cooperate to further support the health promotion to consumers and contribute to the optimization of medical expenses and services.

# 2) Data strengthened via alliance with DeNA

Integration of DB will raise the volume and quality of the DB for health insurance users

Supplements the limited amount of data for elderly patients on the health insurance DB

A medical DB more closely aligned to the actual demographic will enable more accurate diagnosis

Age	Acute diseases	Mild diseases・chronic diseases
65+		**:DeNA** HEALTHCARE **8.08**mn people **Health ins. data** (Health Ins. Associations ＋National Health Ins.＋Elderly in the Latter Stage of Life)

0－14		

The HMV concept is a challenge investment in future growth

It encompasses the infrastructure necessary to achieve our aim of creating a data utilization society

'Karteco'
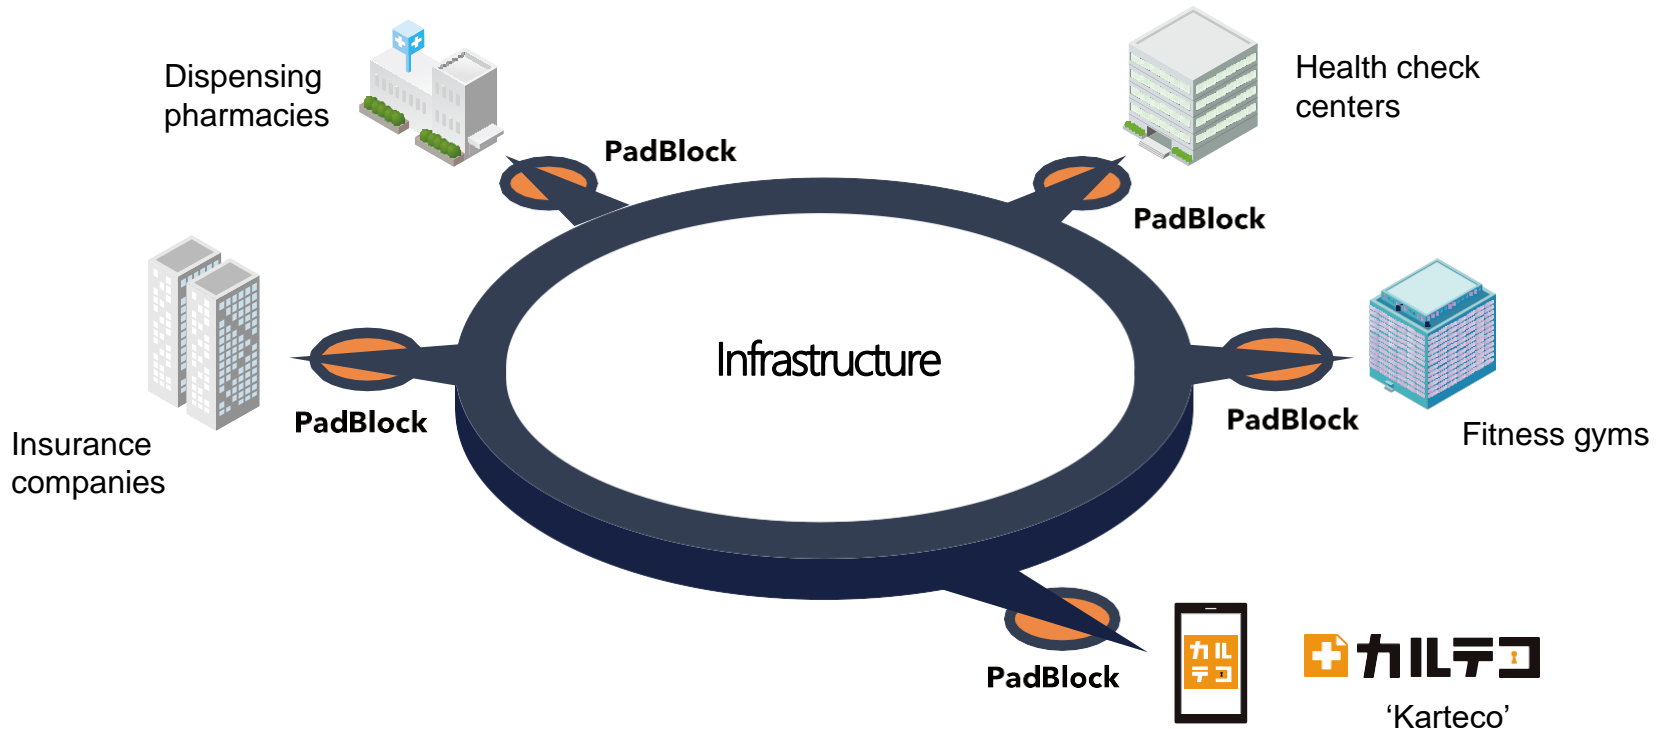

MDV cooperates with SBI Securities to launch "dAIbet" (7/6〜)

SBI SECURITIES account users will be encouraged to actively work on diabetes prevention by downloading "dAIbet".

【2D code for app download】

■Summary
MDV and SBI SECURITIES Co., Ltd. which has the largest number of securities accounts in Japan with approximately 8.45 million accounts (*1) are pleased to announce their new cooperation project to promote diabetes prevention.
Through the cooperation between MDV and SBI SECURITIES, securities account users will receive notifications such as email newsletters. SBI SECURITIES account users will be encouraged to actively work on diabetes prevention by downloading "dAIbet".

※1 As of the end of March 2022, the number of SBI accounts includes the number of SBI Neomobile Securities accounts since the end of April 2019, the number of SBI Neotrade Securities accounts since the end of October 2020, and the number of FOLIO accounts since the end of August 2021.

■About"dAIbet"(※2)
With "dAIbet", any diabetic patient can enter their vital data such as blood test values to manage their exposure to the risk of diabetes aggravation, by displaying indicators on the screen, which can be useful for health management.
Diabetes risk is calculated by AI (artificial intelligence) algorithm based on medical data of MDV. "DAIbet" also provides life-improving measures for diabetes prevention, and users can evaluate how the current risks could be reduced by changing behaviors as a result of implementing those improvement measures. This app is available for free.
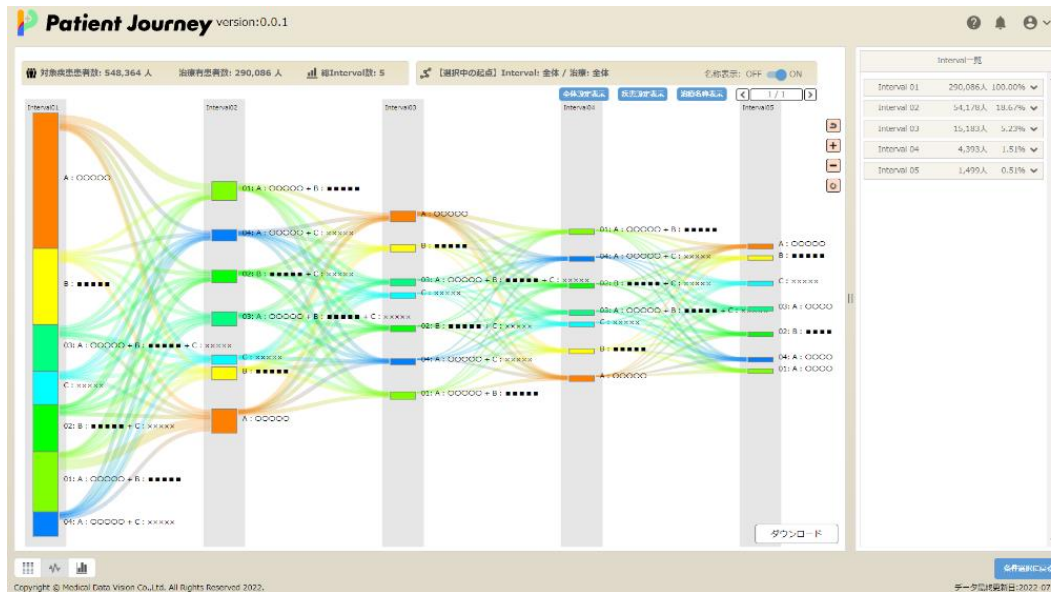

※2 "dAIbet" coined by combining AI and diabetes

Introducing "MDV analyzer for Patient Journey"

A Chronological Approach to Monitor Changes in Treatment & Prescription

What is possible with "MDV analyzer for Patient Journey"

①Grasp the actual conditions of clinical surgery / treatment, drugs, etc for each disease
②Check prescription changes, treatments, etc. of patients undergoing medical treatment in chronological order
③Get a Visual display by Sankey diagram (chart showing flow rate between processes)
④Compare with clinical practice guidelines

Patient Journey is a common expression to represent the historic progression through which a patient would consult medical professionals and would be treated for a disease or symptom, with the subsequent medication and treatment, while the patient's health conditions may evolve positively or negatively, requiring adjustments in the treatment.
By using the "MDV analyzer for Patient Journey", users can enter the name of the disease, set the period, and analyze the evolution of treatment with the conditions of the patient based on details of the surgery / treatment that the patient received, the prescribed medicines, etc. . It is also possible to check the clinical status of each clinical practice guideline.
